FOR IMMEDIATE RELEASE

Pharos Offshore Group Announces the Addition of a New Jet Trencher to Their Fleet: The UTV600

This strategic expansion is in response to increasing demand across the global offshore energy sectors.

Port of Blyth, Northumberland UK (Feb. 29, 2024) -- In response to the surging demand across the global offshore energy sectors, Pharos Offshore Group, a leader in seabed intervention and subsea services, is excited to announce the latest addition to its fleet -- the UTV600 jet trencher.

"Our investment in this jet trencher further demonstrates our commitment to providing innovative solutions tailored to the evolving needs of the subsea industry, whilst delivering our strategic objective of expanding our subsea fleet to meet industry demands," comments Russell Edmondson, Managing Director of Pharos Offshore Group.

Key features and benefits of the UTV600

- Operational depth up to 3,000 meters, catering to the most demanding deepwater projects.
- Interchangeable jetting swords up to 3 meters, providing excellent adaptability.
- 600hp system power, ensuring powerful and efficient trenching operations.
- Operational modes allow for free-fly operations, and both tracked and skid trenching modes offering versatility in approach and execution.
- Supplied with a dedicated Sea State 6 Launch and Recovery System (LARS).
- A newly upgraded control system provides interfacing between LARS, power system and subsea components, alongside next generation multiplexer to support survey sensor requirements.

The UTV600's operational modes allow for controlled trenching of cables, flowlines and umbilicals through a wide range of project variables. The system ensures that product burial tolerances are easily maintained with precision and reliability.

“The UTV600 Jet Trenching ROV is a fantastic addition to the Pharos fleet and strengthens our dedication to delivering the highest standards of performance, reliability, and relevancy for our international clients.” - Eduard de Zwaan, Director of Sales at Pharos Offshore Group

For more detailed information about the UTV600 and how it can support your subsea trenching requirements, visit [UTV600 Jet Trencher](#).

About Pharos Offshore Group: Pharos Offshore Group is a provider of subsea equipment, people and services to the global offshore energy sectors focusing on seabed intervention, observation and inspections for critical subsea infrastructure. From humble beginnings going back 20 years, Pharos employs over 60 members of staff split across onshore and offshore operations, operate globally in locations including Europe, East Asia, Middle East & Americas, and possess an ever-growing asset fleet to aid project fulfilment.
